

IMPROVING Technology for a Secure & Innovative Environment

Core Capabilities

Improvix Technologies, Inc. is an ISO 9001:2015, CMMI-SVC Level III and SBA 8(a) certified IT and Services company focused on developing, implementing, and managing innovative solutions that help our customers accomplish their mission. We understand the critical need for secure and reliable IT solutions. Our proven track record delivers cost-effective, integrated IT solutions that exceed customer expectations and will undoubtedly continue to break current boundaries and enhance the government's technology landscape.

Mobility

We specialize in secure, wireless mobility solutions, including Mobile Device Management (MDM), Mobile Application Management (MAM), Enterprise Mobility Management (EMM), Single Sign-On Integration, Application Integration, Infrastructure Architecture for Supporting Mobile Devices and Tablets on a Classified Network, and NIST / FISMA / FISCAM compliance.

Infrastructure Cloud Migration and Development

Our team provides effective and efficient secure Network Operations, Management, Systems Engineering and Architecture, Monitoring Tools, and Application Development. We specialize in Virtualization (VDI), Cloud Migration and Storage, Disaster Recovery, and Cyber Security.

Secure Communications

We offer technology solutions to communicating classified intelligence from anywhere in the world, including an all-encompassing architecture for secure communications

specializing in Cisco Unified Communications solutions and collaboration endpoints for both voice and video. Our experts provide SBU to TS/SCI Voice using Cisco VoIP technology, TACLANE and AltaSec Encryption, and Cisco Call Manager and Gateway architecture.

Customer Service

Improvix provides VIP-centric, white glove customer service for the highest levels of the Federal government. We practice ITIL-based incident management, a CMMI-SVC-based approach, and have extensive experience transitioning and implementing ServiceNow, developing Service Level Agreements (SLA's), and designing and providing end-user training.
